## Extreme 3 Custom k64 spec TURBO RHD .UK MANIFOLD M50 M52 M54 T3 T4 M50B25 M50B28 M52B28 M54B30 E46 E39 E34 E30 E36

Each exhaust manifold has been pre-heated - it means that all material tensions that may occur during welding are no longer existing - cracking of that kind of product is almost impossible

1/8" NPT socket for the external EGT probe

You can use it with following engines: M50, M52, M54 in E30, E36, E38, E39 or E46 chassis

This is the best option for RHD cars - compact size of our product will give you more space for turbo downpipe etc. AND MAX FLOW !

In conjunction with our exhaust manifold you can use some of the most popular turbochargers like GT28, GT30, GT3582, Holset HX35, HX40, BWS200SX Borg S300, GT35.30,

Thanks to special construction of our product you will be able to use typical performance air filter - not a poor quality and flow filter gauze

WG valve pipe is located in the AC compressor place - AC has to be uninstalled or we can sell you option without WG outlet - you can skip it when turbo has got internal WG or weld WG pipe in appropriate place to keep AC.

&nbsp; &nbsp; k64 performance
